

# Guarding against Infections

## The NEW PM Disposable Scalpel by Swann-Morton

The non-sterile Swann-Morton Disposable Post Mortem Scalpel is the latest addition to a growing range of histopathology and autopsy knives.

With an easy to remove guard to protect the cutting edge up to the point of procedure the end user has the added convenience of not having to fix the blade to the handle and can safely dispose of the scalpel into an appropriate sharps container when the procedure is complete.

Targeted at "dirty" and "infectious" cases the Disposable Post Mortem Scalpel is available with either the standard PM40 or PM40 Bull Nose blade fixed in a distinctive blue handle.

THE WORLD'S LEADING SURGICAL BLADE MANUFACTURER

## How to safely remove the blade guard

**1** Preferably place the Disposable Scalpel over a stable flat surface and identify the guard remover impression highlighted in the illustration.

**3** The guard and Disposable Scalpel will now be separated from each other.

**2** With your thumb located in the guard remover press downwards with your thumb and the guard will release with an audible click.

**4** The blade is now fully exposed and the Scalpel is ready for use.

## Post Mortem Disposable Scalpel
